

LYMPHOMANIACS

October 2008

■ Hot off the presses!

As we mentioned in the last issue of “Lymphomaniacs”, Solaris has a brand new professional packet. New catalogs, new price lists, and a fitter test that you can complete to earn a Tribute Fitter Certificate are included, as well as information on our insurance billing policies and our warranty policies.

Make sure you get a new packet as some important things have changed. We updated our ordering forms with more modification options, as well as extra measurements to help ensure a proper fit for your patient’s garment. We also have new codes for many of our Tribute garments, so please throw away all copies of your old order forms and use our new forms!

We’ve also expanded our Swell Spot line and have a new product preview in the packet. Please call or e-mail to request one today!

■ Swell Spot to benefit Marilyn Westbrook Garment Fund

Last year in October Solaris manufactured a pink ribbon Swell Spot to benefit breast cancer research. This October we’ve changed the color of the ribbon and the cause.

Our new blue ribbon Swell Spot can be used for smaller patches of fibrotic tissue or to soften the appearance of scars. Proceeds will benefit the Marilyn Westbrook Garment Fund, a fund that will help patients get costly compression garments necessary to the treatment of lymphedema.

The new blue ribbon Swell Spot can be purchased through Bandages Plus at www.bandagesplus.com.
